

Platform for Efficient Procurement

Designing a scalable e-commerce experience for [janitorial supplies](#), focused on simplifying bulk purchasing for businesses and individuals.

- As an early-stage startup, Wooden Jug required a structured digital experience that could clearly communicate its value, support efficient product discovery, and simplify procurement workflows.

The Challenges

Learning Objectives

- Design a frictionless flow for bulk ordering, inquiries, and repeat purchases to match real B2B buying behavior.
- ## Build Trust & Credibility
- Incorporate detailed product information, certifications, and visual clarity to support confident purchasing decisions.
- ## Enhance Clarity & Usability
- Establish a strong visual hierarchy and structured layout to reduce cognitive load and improve decision-making.
- ## Streamline Product Discovery
- Enable users to quickly find relevant products through clear categorization, filtering, and intuitive navigation.

Information Architecture

- Highlighted search, categories, and featured products for quick access
- Established strong visual hierarchy to guide users through key actions
- Designed for quick scanning, reducing cognitive load and improving usability

- Reduced visual clutter to support faster decision-making
- Enabled users to evaluate multiple products with minimal effort
